PROFILE

Hardworking and enthusiastic Junior Software Developer with a strong client facing background with a passion for problem-solving. I have a Bachelor's degree from Dnipro University of Technology, Ukraine. Currently living in London, UK with the right to work in the UK. I feel that my studies have equipped me with the tools required to commence a career in a new field for which I have recently gained a qualification. With my newly acquired abilities and skills, I hope to work as a Junior/Graduate Software Developer and learn as much as I can in order to develop my coding skills further.

I feel that I have gained excellent problem solving skills and am able to address customers needs through my aptitude to listen, and ability to understand issues whilst utilising my learned skill of negotiation.

My enthusiasm and drive to satisfy customers and produce an excellent standard of work also leads me down creative paths where I can confidently say that I am an out of the box thinker with unique ideas and approaches.

I have graduated from Digital Skills Bootcamp at Just IT Training in London and am working on my portfolio and development skills. I have trained to be a Software Developer, focusing on React and other frontend skills. In my own time, since graduating, I have started working on projects to further my skills and ability in this area. I have also embarked on some self study in order to keep my knowledge current.

EDUCATION & QUALIFICATIONS

Just IT - Software Engineering Bootcamp 12 weeks.	2022
Treehouse Tech Degree - Front End Development Certificate.	2022
Dnipro University of Technology, Ukraine - Bachelor's degree in Mining Engineering.	2012

TECHNICAL SKILLS

HTML / CSS / SASS / MUI / Bootstrap / Responsive design

JavaScript / React / React Hooks / Understanding of Agile Methodologies(Scrum, Kanban)

GIT / GITHUB

SQL / MySQL / Firebase used in a few projects.

PROJECTS

- I have built a responsive, mobile-first layout using HTML and CSS. The layout demonstrates an understanding of responsive design by adjusting to accommodate small, medium, and large screen sizes.
- I created an interactive photo gallery using JavaScript and CSS Grid Layout. At the top of the page there is a search area where photos will hide and show depending on user input. When the user clicks on a thumbnail, the photo will display in a lightbox. There are "back" and "previous" arrows to cycle through photos.
- I created an Awesome Startup employee directory using the Random User Generator API (https://randomuser.me/) to grab information for 12 random "employees," and use that data to build a project. I request a JSON object from the API using fetch and parse the data so that 12 employees are listed in a grid with their thumbnail image, full name, email, and location.
- I have built a layout of a social app using the Material UI React component library.
- Portfolio website with projects https://oleksandr.co.uk, GitHub page https://github.com/AlexDXB.

WORK EXPERIENCE

Front-End Developer Student | Just IT, London, UK   **Apr 2022 to Aug 2022**

- Used HTML, CSS and responsive design, created mobile-first web pages with a layout that adjusts to fit mobile phones, tablets and desktop displays.
- Used SASS to speed up styling, layout and development in general.
- Used JavaScript to create an employee directory by communicating with a third-party API.
- Attended online training.
- Pushed project files to GitHub using GIT commands.
- Learned technologies such as HTML, CSS, SQL, JavaScript and GIT.
- Built site portfolio during course.

Web Developer Student | Treehouse Tech Degree, UK   **Mar 2022 to Jul 2022**

- Designed web pages that look and function well on multiple screen sizes using mobile-first approach.
- Developed pages such as registration form, interactive photo gallery, charts, graphics and other user interface components using HTML5, CSS3, SASS, Bootstrap and JavaScript.
- Built an interactive dashboard for a web application using advanced web techniques including SVG graphics and JavaScript programming.
- Collaborated with other students to implement new features for projects.
- Completed Treehouse Tech Degree where I learned fundamental and intermediate concepts of Web Development.
- Built 9 projects during 3 months which demonstrate my understanding of Web Development concepts.

Sales Consultant | Breitling Boutique, Dubai Mall, UAE   **Oct 2017 to Dec 2021**

- Monitored company inventory to keep stock levels and databases updated.
- Inspired customers and exceeded their expectations by providing a luxury selling experience to all by using excellent product and brand knowledge.
- Consistently achieved or exceeded monthly and seasonal individual and store sales goals, enhanced and developed the business.

INTERESTS

Computing: I really enjoy the creative part of Web Development, where I could come up with ideas for websites and projects which I could then turn into a reality.

Hobbies: I am a big fan of football(playing, watching), I also enjoy cooking and travelling to explore different countries and cultures.

ADDITIONAL INFORMATION

Language : English, Ukrainian, Russian.

Driving Licence : Category B.

Right to work in the UK : Yes, Spouse visa.
